WARNING

1. Be sure to carefully read and understand the instructions before attempting to install NXL10SUBLD Subwoofer Box.
2. For safety, disconnect the negative battery terminal from the battery prior to beginning the installation.
3. Use high quality connectors for a reliable installation and to minimize signal or power loss.
4. **Think before you drill!** Be careful not to cut or drill gas tanks, fuel lines, brake or hydraulic lines, vacuum lines or electrical wiring when working on any vehicle. If installing in a boat, take care not to cut or drill through the mail hull.
5. Never run wires underneath the vehicle. Running the wire inside the vehicle or hull area provides the best protection.
6. Avoid running wires over or through sharp edges. Use rubber or plastic grommets to protect any wires routed through metal - especially the firewall.

MOUNTING

1. Determine where the Subwoofer Box will be mounted. Ensure an area large enough for the Box to mount evenly. Only mount to flat surface.
2. Mark the locations for the mounting screws. Drill the hole with a 13/64 bit.
3. Feed the speaker wire through the cutout and connect to the speaker terminals. Be sure to observe proper polarity when connecting the wires. The speaker's positive terminal is indicated with a "+".
4. Fit the Subwoofer Box and mount into place using four (4) screw supplied.
5. Tighten the screws until the Box is snug in place.
6. **LED CONNECTION** - There are two options to choose from:
 - 6.1- Connect RGB Wires to RF RGB LED Controller or WIFI RGB LED Controller (optional).
 - 6.2 - Connect to battery (DC12V), Speaker RGB LED fast Terminal "V+" connected to Battery Positive
